

Click "Terrain Object"->Add Component -> Script->Instant Road Path

Click -> More control -> Replace Texture -> Select Texture

Click -> Start Point -> Click  
on Scene Terrain Object

Click -> End Point -> Click on  
Scene Terrain Object

Click Construct

Attention..

- "Environment" from standard assets are needed for demo scenes to work.
- has passed compatibility test with EasyRoads3D v2
- To avoid generation failure please place start point on the plat area.
